Attorneys for the State
Water Resources Control Board

IN THE SUPERIOR COURT OF THE STATE OF CALIFORNIA

IN AND FOR THE COUNTY OF LASSEN

In the Matter of the Determination }
of the Rights of Various Claimants }
to the Waters of Long Valley Creek }
Stream System within Lassen, Sierra }
and Plumas Counties, California }

NO. 12999

The above-entitled cause having come on regularly for hearing, trial, and determination on the 21st day of April, 1975, before this Court sitting without a jury; all parties in interest in said proceeding having been duly and regularly notified of said hearing, trial, and determination; the State Water Resources Control Board (hereinafter referred to as "Board") having filed with the Clerk of this Court a certified copy of its Order of Determination together with the original evidence filed with or taken before the Board and certified by it; exceptions to the Order of Determination having been filed by U. S. Plumas National Forest and U. S. Toiyabe National Forest, Donald E. Ramelli, John W. Barrett, James S. and Mary T. Tyzbir, and

Edith Evans; the Board having moved the Court to amend and affirm the Order of Determination as amended; the exceptions to the Order of Determination as amended having been heard on January 19, 1976, briefs having been exchanged on certain issues, the matter having been submitted for decision and the Court being fully advised in the premises granted the motion of the Board to amend the Order of Determination, and entered an order on exceptions on April 19, 1976, now affirms said Order of Determination as amended, and renders this its decree determining the rights of all parties involved in this proceeding as follows, to wit:

IT IS ORDERED, ADJUDGED, AND DECREED that the several rights of all existing claimants in and to the use of water of the Long Valley Stream System, within Lassen, Sierra and Plumas Counties, California, are as hereinafter set forth:

Definitions

1. Water Code

The term "Water Code" means the State of California Water Code.

2. Stream System

The term "stream system" means Long Valley Creek stream system, including all tributaries from their headwaters to the confluence of Long Valley Creek with Honey Lake in Lassen County, California insofar as they are within the State of California but does not include underground water

supply other than a subterranean stream flowing through known and definite channels or springs or standing pools not specifically included in this order which do not contribute to a flowing stream or have no natural outlet, or water used by natural meadows which does not require that water be diverted from a flowing stream.

3. Claimant

The term "claimant" means a party who has filed a proof of claim of water right in and to the use of water of Long Valley Creek stream system, or who having failed or refused to properly file such a proof of claim has had his right determined pursuant to provisions of Water Code Section 2604.

4. Direct Application

The term "directly apply to beneficial use" means the direct conveyance and application of water diverted to beneficial use without intermediate storage, except such reasonable regulatory storage as may be practiced for the purpose of creating a convenient head for irrigation or other beneficial use allowed herein.

5. Natural Flow

The term "natural flow" means such flow as will occur at any point in a stream from the runoff of the watershed which it drains, from springs and seepage which naturally contribute to the stream, and from waste and return flow from dams, conduits, and irrigated lands, as distinguished from

water released directly from storage for rediversion and use, or water imported from another watershed which is released directly to the natural channel for conveyance to place of beneficial use.

6. State Water Resources Control Board Map

The State Water Resources Control Board map, hereinafter referred to as SWRCB map, is the map prepared by the Board from surveys made in 1969 and 1970, as revised and amended in 1975 and 1976 by the Board, which map is entitled, "Long Valley Creek Stream System within the State of California, showing Diversions and Irrigated Lands, Lassen, Sierra, and Plumas Counties, California, dated 1976" and is on file in this proceeding. Said SWRCB map comprising eight sheets, plus an index sheet, is incorporated herein.

General Entitlement

7. Diversion and Use of Water

The several claimants in the proceeding are entitled to the use of water of Long Valley Creek stream system on their lands and from points of diversion described under their respective names in Schedule 1, and shown on the SWRCB map, during the periods of time specified in paragraph 15, and in the amounts allotted from the various sources under the priorities and for the uses set forth after their respective names in Schedules A, B, and C, and paragraphs 24 through 51 and as said uses are defined in paragraphs 16 through 19. The points of measurement of the amounts of water allotted shall be at the points of diversion from the stream system unless otherwise specified.

8. Reasonable Use

Nothing herein contained shall, or shall be construed to, allocate to any claimant a right to divert from Long Valley Creek stream system, at any time, a quantity of water in excess of an amount reasonably necessary for his beneficial use, nor to permit him to exercise his right in such a manner as to unreasonably impair quality of the natural flow.

9. Schedules of Allotments

The allotments of water of the Long Valley Creek stream system, except for those in paragraphs 24 through 46, are set forth in three separate schedules as follows:

Special Class Rights set forth in Schedule A.

Independent Tributary Streams set forth in Schedules B-1 through B-25

Long Valley Creek set forth in Schedule C

Each of these schedules show the Name of Claimant, Diversion No. on SWRCB Map, Use, Area Served in Acres, and Allotment. Schedule A also shows the Source of Water.

The schedules show the (1) name of claimant as defined in paragraph 3, (2) the diversion number located in Schedule 1 and shown on SWRCB Map followed in parentheses by the number of the map sheet on which the point is.

shown and the letter designation of the schedule in which the right is included, (3) the use as defined in paragraphs, 16, 17, 18, and 19, (4) area served in acres shows the number of acres served from the particular point of diversion or group of diversions which may be all or part of the place of use of the claimant shown in Schedule 1, (5) source of water, shown in Schedule A only, is the name given to the spring or spring channel to which the claimant has a right, and (6) allotment in cubic feet per second (cfs) and the priority class defined in paragraph 13.

10. Special Class Rights

All special class rights are superior in priority to and independent of all other rights in the stream system.

11. Independent Tributary Streams

Schedule B is divided into 25 independent tributary streams or stream groups each named and designated as Schedule B-1 through Schedule B-25 as follows:

- B-1 East Branch and Unnamed Tributary
- B-2 South Creek
- B-3 Purdy Creek and Tributaries
- B-4 Balls Creek and Tributaries
- B-5 Occidental Unnamed Streams
- B-6 Evans Canyon Creek
- B-7 Roberts Canyon Creek and Coulee Canyon Creek

- B-8 Railroad Tunnel Creek
- B-9 Saralegui Home Stream Group
- B-10 Saralegui Main Meadow Stream
- B-11 Frost Unnamed Streams
- B-12 Zamboni Springs
- B-13 Whitehouse Creek
- B-14 Harris Canyon and Zamboni North Stream
- B-15 Rhodes Creek and Shaber Creek
- B-16 Rowland Drainage Collection Channel
- B-17 Matley South Stream and Matley North Stream
- B-18 Dickstein Palcanis Unnamed Stream
- B-19 McKissick Creek
- B-20 West Side Slough
- B-21 Overflow Channels
- B-22 Dry Valley Creek
- B-23 Willow Ranch Creek and Tributaries
- B-24 Anderson Unnamed Stream
- B-25 Downing Canyon Creek

Rights set forth in each of the 25 independent tributary streams or stream groups in Schedule B are inferior in priority to all special class rights and are interrelated with all other rights from the same stream or stream group, but are independent from each other stream or stream group within Schedule B and are superior in priority to rights in Schedule C, except for allotments in nine stream groups in those certain priority classes

shown in columns 1 and 2 of the following table which are equal in priority and correlative in right with allotments in those certain priority classes in Schedule C shown in the corresponding line in column 3.

Column 1	Column 2	Column 3
Stream Group in Schedule B	Priority Class in Schedule B	Priority Class in Schedule C
B-1 East Branch and Unnamed Tributary	4th	5th
B-2 South Creek	6th	5th
B-4 Balls Creek and Tributaries	4th	5th
B-6 Evans Canyon Creek	3rd	5th
B-7 Roberts Canyon Creek and Coulee Canyon Creek	4th	5th
B-8 Railroad Tunnel Creek	2nd	5th
B-14 Harris Canyon and Zamboni North Stream	3rd	9th
B-23 Willow Ranch Creek	3rd	9th
B-25 Downing Canyon Creek	4th	9th

12. Long Valley Creek

All rights from Long Valley Creek set forth in Schedule C are interrelated with all other rights in Schedule C and those certain rights in Schedule B set forth in the table in paragraph 11 and inferior in priority

to all rights in Schedules A and B except as set forth in paragraph 11. All allotments in first priority class and seventh priority class are for domestic and stockwatering purposes only and are not to be diverted for any other purposes. Any such amount not beneficially used for domestic or stockwatering purposes is to remain in the stream for stream flow maintenance.

13. Priority Classes

The term "priority class" when used herein means a class of rights each one of which is equal in priority and correlative in right with all other rights of the same class appearing within the same schedule, so that in the event of a supply of water sufficient to supply only part of the entitlement of any specific priority class, said available supply shall be prorated in accordance with allotments in that priority class. No priority class is entitled to the use of any water until all rights of all priority classes with lower numbers have been fully satisfied. Thus, within the same schedule, all rights of the second priority class are inferior in priority and subordinate to all rights of the first priority class, but are superior in priority and entitled to full satisfaction ahead of all of the remaining higher numbered priority classes. Each successive higher numbered priority is subordinate to all rights in lower numbered priorities, but is superior to and entitled to full satisfaction ahead of all higher numbered priorities.

14. Surplus Class Rights

Surplus Class Rights are for winter storage. They are inferior in priority to all rights in Schedules A, B, and C to the extent these rights are beneficially used during the seasons of use described in paragraph 15. Each of these storage rights is based on applications filed with the Board with each individual priority based on the date of filing of the application with the earlier filing date having the higher priority. These rights are further described in paragraphs 42 through 46.

15. Seasons of Use

All allotments in Schedule A shall be for continuous use throughout the year. All allotments in first priority class in Schedules B-1 through B-25 except Schedule B-8 and in first priority class and seventh priority class in Schedule C are for domestic and stockwatering purposes throughout the year. All other allotments in Schedules B and C, except the allotment in Schedule B-19, fourth priority class are for irrigation and shall be for continuous use from March 1 to October 15 except that in years of below normal precipitation water may be diverted during February for preirrigation and except further the allotment of Victor J. Zamboni from Harris Canyon and Zamboni North Stream Schedule B-14 in second priority class and Shirley C. Anderson and Alan Nichols from Anderson Unnamed Stream Schedule B-24 in Second Priority may be diverted from October 16 of each year to the end of February of each succeeding year for preirrigation

and except further Ermin J. Hintz may divert the entire flow of Zamboni Springs through Diversion No. 73 year-round for heating a greenhouse provided that 90 percent of the water is returned to the stream. The allotment of Eagle Peak Ski Area from McKissick Creek set forth in Schedule B19 in fourth priority class for industrial purposes is for continuous use from November 1 of each year to the end of February of the succeeding year.

16. Domestic and Stockwatering Use

Domestic use is limited to water applied exclusively for household purposes, watering of domestic animals, and irrigation of up to one-half acre of yard, garden, or family orchard. Stockwatering is limited to water required by commercial livestock or wildlife. All allotments designated "dom" in the use column of Schedules A, B, and C are solely for domestic and stockwatering purposes.

17. Irrigation Use

Irrigation use is limited to the application of water for the purpose of meeting moisture requirements of growing crops.

18. Industrial Use

Industrial use is limited to the production of artificial snow and its application to the ski slope.

19. Combined Uses

Claimants diverting water under allotments for irrigation use are entitled to use water for domestic and stockwatering purposes incidental to irrigation use.

20. Preirrigation

Preirrigation use is the application of water to irrigated land prior to the start of the growing season to increase the moisture content of the soil for the purpose of reducing the amount of water necessary to apply after the start of the growing season to provide the moisture requirements of the growing crop.

21. Equivalent Flow to Provide Adequate Head

Although all quantities of water allotted to the several claimants for direct application to beneficial use in Schedules B and C are expressed in terms of continuous flow, nevertheless, except as otherwise provided in this paragraph, nothing herein contained shall be construed as limiting or restricting the right of any such claimant to rotate in the use of water with other related rights in the same stream group or to divert for limited periods of time "heads" convenient for the specified purpose of use and thus apply water to his place of use at a greater rate than indicated by the quantity of continuous flow so allotted or to divert the allotment of water into a reservoir for regulatory purposes; provided that such practice of rotation or regulation to obtain a convenient

"head" shall not result in the use by any such claimant of a total quantity of water during any 30-day period in excess of the equivalent of claimants' continuous flow allowance; and provided further that such practice of rotation or regulation shall not cause an unreasonable interference in the regimen and quantity of available natural flow as defined in paragraph 5 to which others are entitled. Subject to the foregoing impairment and infringement limitations, the following claimants are entitled to maintain a reservoir for such regulatory purposes.

- (1) The Fred E. Galeppi Reservoir within the SW $\frac{1}{4}$ of SE $\frac{1}{4}$, Section 1 and the NW $\frac{1}{4}$ of NE $\frac{1}{4}$ of Section 12, both in T24N, R17E, MDB&M.
- (2) The Victor J. Zamboni Reservoir within the NW $\frac{1}{4}$ of NW $\frac{1}{4}$, Section 10, T24N, R17E, MDB&M.
- (3) The Matley South Stream Reservoir within the NW $\frac{1}{4}$ of NW $\frac{1}{4}$, Section 4, T24N, R17E, MDB&M.
- (4) The Matley North Stream Reservoir within the SW $\frac{1}{4}$ of NW $\frac{1}{4}$, Section 33, T25N, R17E, MDB&M.
- (5) The S. L. Robinson Reservoir within the W $\frac{1}{2}$ of SW $\frac{1}{4}$, Section 16, T25N, R17E, MDB&M.

22. Gross Acreage

Gross acreage as used herein means the total area that could be irrigated with a proposed distribution system any part of which can be

irrigated in any one year with the water allotted. The places of use shown in Schedule 1 for Shirley C. Anderson, and Alan H. Nichols, Jack and Edith A. Phillips, U. S. Hertz, Inc. and James S. and Mary T. Tyzbir are gross acreages.

23. Net Consumptive Use Right

Net consumptive use right as used herein means that the allotment is to be measured as the difference between the amount diverted and the amount returned to the stream system. Such rights can be exercised provided that the place of use is not moved or enlarged and provided further that such method of diversion does not cause an unreasonable interference in the regimen and quantity of available flow as defined in paragraph 5 to which others are entitled. Net consumptive use rights attach to the allotments of Donald E. Ramelli in Schedule B-4, second priority class which allows a gross diversion of 5.90 cfs; Glenn H. and Evelyn F. Edgerton in Schedule B-23, first priority class; Rodney and Lillian A. Orr in Schedule B23, first and second priority classes; and J. and A. Hull in Schedule C fifth priority class.

Other Rights, Special Provisions, and Surplus Class Rights

24. Donald E. Ramelli is entitled to divert 2.5 cfs at a point designated as Diversion No. 36 on SWRCB Map through the pond in the NW $\frac{1}{4}$ of SW $\frac{1}{4}$, Section 20, T21N, R17E, MDB&M throughout the year for fishery and recreational purposes in a priority superior to all downstream rights, provided all of the water is returned to the stream except reasonable conveyance and evaporation losses.

25. L. B. M. Properties Inc. are entitled to fill and maintain full throughout the year two stockwatering ponds on South Creek within the E $\frac{1}{2}$, Section 25, T21N, R17E, MDB&M at points designated as Diversion Nos. 20 and 21 on SWRCB Map from their first priority class right set forth in Schedule B-2.

26. L. B. M. Properties Inc. are entitled to fill and maintain full throughout the year the pond within the SW $\frac{1}{4}$ of NE $\frac{1}{4}$, Section 26, T21N, R17E, MDB&M designated as Diversion No. 30 on SWRCB Map from their special class right set forth in Schedule A from Diversion Nos. 31 or 32.

27. Hubert D. and Emily Trost are entitled to fill and maintain full through the year the pond within the SW $\frac{1}{4}$ of NE $\frac{1}{4}$, Section 4, T22N, R17E, MDB&M designated as Diversion No. 57 on SWRCB Map (Old Log Pond) from their special class right set forth in Schedule A from Diversion Nos. 57, 57a, or 57b.

28. Saralegui Land and Livestock Company is entitled to fill and maintain full throughout the year the stockwatering pond within SW $\frac{1}{4}$ of SE $\frac{1}{4}$, Section 8, T23N, R17E, MDB&M designated as Diversion No. 64 on SWRCB Map (Saralegui stockwatering pond) from the company's first priority class allotment in Schedule B-9.

29. Matley, John M. et al are entitled to fill and maintain full throughout the year the stockwatering pond within the SW $\frac{1}{4}$ of SE $\frac{1}{4}$, Section 33, T25N, R17E, MDB&M designated as Diversion No. 93 on SWRCB Map (Matley Spring) from their first priority class allotment in Schedule B-17.

30. Jane Ramelli is entitled to fill and maintain full throughout the year the stockwatering pond within the NE $\frac{1}{4}$ of NW $\frac{1}{4}$, Section 28, T25N, R17E, MDB&M from her allotments in Schedule B-19 from irrigation return flow or from seepage from the Hall Ditch leading from Diversion Nos. 97 and 98 on SWRCB Map provided; however, that Jane Ramelli shall have no control over the diversions into said Hall Ditch.

31. U. S. Bureau of Land Management is entitled to fill the stockwatering pond within the SE $\frac{1}{4}$ of NW $\frac{1}{4}$, Section 19, T25N, R18E, MDB&M designated as Diversion No. 107 on SWRCB Map (Pickens Reservoir) from the natural flow of the unnamed stream on which the stockwatering pond is located at such times as water is available for collection in a priority superior to all downstream rights.

32. Shirley C. Anderson and Alan H. Nichols is entitled to fill and maintain full the pond within the SE $\frac{1}{4}$ of NE $\frac{1}{4}$, Section 11, T25N, R16E, MDB&M designated as Diversion 126 on SWRCB Map (Anderson Dam) from his first priority allotment in Schedule B-24 at such times as said pond is not being used as regulatory storage for his second priority allotment in Schedule B-24.

33. U. S. Hertz, Inc. is entitled to fill and maintain full ponds within Section 2, T25N, T16E, MDB&M designated as Diversion Nos. 126a, 133a, 133b, and 133c from its allotment in special class rights set forth in Schedule A.

34. U. S. Hertz, Inc. is entitled to fill from Downing Canyon Creek the ponds within Section 2, T25N, R16E, MDB&M designated as Diversion Nos. 126b,

133d, and 133e subject to first priority allotments in Schedule B-25 and to use such ponds for regulatory storage for its third priority rights in Schedule B-25.

35. County of Lassen is entitled to fill and maintain full throughout the year the pond in the SE $\frac{1}{4}$ of SW $\frac{1}{4}$, Section 27, T26N, R16E, MDB&M designated as Diversion No. 135 on SWRCB Map from the springs naturally flowing into the pond and supplemented to the extent necessary to reasonably maintain the pond for park purposes by water diverted from a point designated as Diversion No. 134 on SWRCB Map (Rocky Hixon Spring) in a priority superior to all other rights.

36. Frank C. Trosi and Camille T. Ryan are entitled to divert the entire flow of Coulee Canyon at a point designated as Diversion No. 55b on SWRCB map as necessary to fill their allotments in Schedule B-7.

37. Fred E. Galeppi is entitled to the use of water throughout the year for domestic and stockwatering purposes from the lake in the E $\frac{1}{2}$ of SE $\frac{1}{4}$ Section 20 and W $\frac{1}{2}$ of SW $\frac{1}{4}$ Section 21, T23N, R17E, MDB&M to the extent water is diverted for these purposes.

38. Any claimant in the Long Valley Creek watershed within California may divert in first priority class, throughout the year, subject to all upstream rights, from any of the stream groups in Schedule B or Schedule C an amount of water that may be necessary for timber harvesting, road building, or stockwatering purposes from any point of diversion on the claimants

land or to which he has access provided such amount of water or method of diversion will not unreasonably impair the first priority rights of other claimants in the same stream group.

39. United States Bureau of Land Management is entitled to divert at a point designated on SWRCB map as Diversion No. 111 (Jesus Spring) 8,640 gallons per day throughout the year for domestic, stockwatering, wildlife propagation, and fire protection purposes on land described in Schedule 1 and as further defined in License 8803 issued on Application 20990.

40. United States Bureau of Land Management is entitled to divert at a point designated on SWRCB map as Diversion No. 114 (Indian Spring) 8,640 gallons per day throughout the year for domestic, stockwatering, wildlife propagation, and fire protection purposes on land described in Schedule 1 and as further defined in License 8804 issued on Application 20991.

41. United States Plumas National Forest is entitled to divert at a point designated on SWRCB map as Diversion No. 130 (Young Spring) 270 gallons per day from about May 1 to about October 31 of each year for stockwatering purposes on land described in Schedule 1 and as further defined in License 8974 issued on Application 21335.

42. U. S. Hertz, Inc. is entitled to divert in "surplus class" at a point designated on SWRCB Map as Diversion No. 132 (Parman Reservoir) 45 acre-feet per annum during the period from about November 1 of each year to about May 1 of the succeeding year or as much thereof as is

impounded in Parman Reservoir and thereafter applied to beneficial use for irrigation purposes on land described in Schedule 1 and further defined in License 3951 issued on Application 11660.

43. L. B. M. Properties, Inc. are entitled to divert in "surplus class" at a point designated on SWRCB Map as Diversion No. 3 (Aldabe Reservoir) 143 acre-feet per annum during the period from about September 15 of each year to about March 1 of the succeeding year or as much thereof as is impounded in Aldabe Reservoir and thereafter applied to beneficial use for irrigation and stockwatering purposes on land described in Schedule 1 and further defined in License 4091 issued on Application 13582.

44. L. B. M. Properties, Inc. holding Permit 16719 on Application 23962 has the right to divert in "surplus class" at points designated on SWRCB Map as Diversion Nos. 16 and 17, 19 acre-feet per annum into Lindquist Reservoir (Diversion No. 17a) during the period from October 1 of each year to March 1 of the succeeding year for irrigation, domestic, and stockwatering purposes on land described in Schedule 1 as further defined in Permit 16719, all to the extent such right is completed under provisions of the Water Code.

45. U. S. Hertz, Inc., holding Permit 16753 issued on Application 23988 has the right to divert in "surplus class" at the point designated on SWRCB Map as Diversion No. 132a (New U. S. Hertz Dam) 227 acre-feet per annum during the period from November 1 of each year to May 1 of the succeeding

year for irrigation and power purposes on land described in Schedule 1 as further defined in Permit 16753 all to the extent such right is completed under provisions of the Water Code.

46. Jack and Edith A. Phillips holding unapproved Application 24057 have the inchoate right to divert in "surplus class" at the point designated on SWRCB Map as Diversion No. 60c (Phillips Dam) 10 acre-feet per annum during the period November 1 of each year to March 1 of the succeeding year for irrigation, stockwatering, recreational, and fire protection purposes on land described in Schedule 1 as further described in Application 24057 all to the extent such inchoate right is completed under provisions of the Water Code.

47. The allotment of Green Gulch Ranch, Inc. is Schedule B-3 second priority is to first be filled from the flow of School House Creek measured at the Lindquist-Green Gulch Ranch property line between the SE $\frac{1}{4}$ of SW $\frac{1}{4}$ and the SW $\frac{1}{4}$ of SE $\frac{1}{4}$, Section 24, T21N, R17E, MDB&M and the flow of an unnamed stream measured at the point designated as Diversion No. 34 on SWRCB Map with only the remaining unsatisfied portion of the allotment being filled from the main stem of Purdy Creek.

48. Prior to June 15 of each year, a maximum of 2.00 cfs of the total allotment of Green Gulch Ranch, Inc., in Schedule B-4 may be conveyed south of the Balls Creek Road shown on State Water Resources Control Board map. After June 15 of each year no water for irrigation and no more than 0.10 cfs for domestic and stockwatering purposes may be conveyed south of Balls Creek Road.

49. The allotment of Hazel H. Hilberg is Schedule B-17 second priority may be diverted from Matley South Stream by pipeline or ditch at some point to be determined at a future date, but only to the extent necessary to supplement water reaching her property from other sources for irrigation of her land shown in Schedule 1.

50. The allotment of James Sr. and Aileen Hull set forth in Schedule C fifth priority to be diverted at the point designated as Diversion No. 102 on SWRCB map may be diverted from Diversion Nos. 97 or 98 from West Side Slough.

51. The point of measurement of the allotment of Samuel L. and Katherine L. Robinson set forth in Schedule C in sixth priority shall be at the point where the ditch leading from Diversion No. 103 crosses under the levee on the Hull property near the line between NW $\frac{1}{4}$ of NW $\frac{1}{4}$ and the NE $\frac{1}{4}$ of NW $\frac{1}{4}$, Section 21, T25N; R17E, MDB&M.

1/ These allotments are for domestic and stockwatering purposes only and shall not be diverted for irrigation.

2/ This allotment is to be measured as the flow of Long Valley Creek at Highway 395 in the SE₁ of SW₁, Section 26, T25N, R16E, MDB&M.

RETENTION OF JURISDICTION

52. IT IS FURTHER ORDERED, ADJUDGED, AND DECREED: That the Court retains continuing jurisdiction of the parties to this proceeding, and of the subject matter hereof, and upon application of any party hereto, or successor in interest thereof, or upon its own motion, to review this decree and to change or modify the same as the interests of justice may require.

EFFECT OF DECREE

53. That each and every party to this action, his or her agents, successors, grantees and assigns, be and hereby are perpetually enjoined and restrained from doing anything in violation of the terms or provisions of this judgment and decree, and from diverting any water from said Long Valley Stream System as defined herein at any time in excess of a quantity reasonably necessary for, and actually applied to, reasonable beneficial use, under and by reasonable methods of diversion and use, and from doing anything, directly or indirectly, that will obstruct or interfere with any right of another adjudged and decreed herein.

54. This decree is conclusive as to the rights of all existing claimants in the Long Valley Creek stream system as defined herein, provided that the water right confirmed herein for land, or any portion thereof shown as irrigated on the SWRCB map in Sections 27

and 34, T26N, R16E, MDB&M will be allotted to Joe C. Marsters et al if they establish title to said land in the pending disputes over property boundaries.

55. Any person who has failed to appear and submit proof of his claim as provided in Chapter 3, Division 2 of the Water Code, shall be barred and estopped from subsequently asserting any rights heretofore acquired upon the Long Valley Creek stream system as defined herein and has forfeited all rights to water heretofore claimed by him on said system, other than as provided in this decree, unless entitled to relief under the laws of this State.

Done this 5th day of August, 1976

ARTHUR J. ANDERSON
Judge of the Superior Court
